# About the Institute of Ultrasound Diagnostics

---

Thank you for your interest in the Institute of Ultrasound Diagnostics (IUD)!

The One Year General Sonography program at the Institute of Ultrasound Diagnostics is unlike most sonography programs offered in a college or university setting. It is an **ADVANCED, ACCELERATED, fulltime technical program**. It requires self-motivation, good time management skills, and a good attitude. For those requiring additional time considerations in order to process information or desire a slower paced environment, this program may not be for you.

**Our program covers in 12 months what most schools cover in 18-24 months.**

Once you begin the sonography program, you can expect fast paced information delivery and clinical instruction. Additionally, our program is one of the few sonography programs that offers a distance education option. This means if you live outside our area, you may be able to complete the program without relocating.

**Our One Year Program provides an extensive education in abdominal and OB/GYN sonography.** Graduates will be well versed in current techniques and at ease with several commercially available ultrasound systems. Several of our clinical affiliates perform neonatal neurosonology, vascular, and echocardiography examinations. One Year students have the opportunity of rotating through these areas for an introduction to the techniques practiced in each specialty. Other specialties emphasized in the One Year Program include transvaginal sonography, and high-risk obstetrics. Clinical rotations in hospital departments of varying sizes, outpatient clinics, and mobile units prepare our students to function in a variety of work situations. CME certificates and a One Year certificate will be awarded upon completion. **This program can be attended as a LOCAL or a DISTANCE student.**

**Our program is CAAHEP accredited.** This not only means we hold the top accreditation for Ultrasound programs, but our students are eligible to take the National Certification exams through the American Registry for Diagnostic Medical Sonography (ARDMS) and the American Registry of Radiologic Technologists (ARRT) as early as 60 days before graduation. Students who take and pass these exams have the ability to be registered sonographers on their graduation day. Students are eligible to take Sonography Physics Instrumentation (SPI), Abdomen, and OB/GYN registry exams.

## A Letter From the Directors

---

Sonography is a highly technical field requiring the expertise of individuals dedicated to maintaining high professional standards. Many physicians rely heavily on their sonographer's ability to collect and sort clinical data. The art of scanning requires cultivation and time to be perfected. The Institute of Ultrasound Diagnostics understands how important quality education is for the sonographer. Sonography is not learned in a few months but instead is a career of learning. The ever-changing technology is only part of the challenge and excitement that the field offers. **The One Year General Sonography program provides students the opportunity to rise into the very rewarding career of ultrasound in only 12 months.** Please read over the information in this packet and let us know if you would like to begin your journey into ultrasound with us!

*~ Kathy Gill, MS, RT(R), RDMS*

*~ Melinda Freeman, Rt(R), RDMS, RVT*

*~ G. Michael Maresca, MD*

## School Information

The Institute of Ultrasound Diagnostics is located at:

**One Timber Way, Suite 203  
Daphne, Alabama 36527**

Institute of Ultrasound Diagnostics, Inc. is under the ownership of Kathryn A. Gill and Micah Gill. It was incorporated under Alabama laws on February 26, 1986.

## Accreditations and Licenses

The Institute of Ultrasound Diagnostics, One Year General Sonography Program (Local and Distance) is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

**1361 Park Street  
Clearwater, FL 33756  
Phone: (727) 210-2350  
[www.caahep.org](http://www.caahep.org)**

The Institute of Ultrasound Diagnostics is licensed by the Alabama Department of Postsecondary Education for Private Schools.

**135 S. Union St.  
Montgomery, AL 36104  
Phone: (334) 293-4500  
[www.accs.edu](http://www.accs.edu)**

The Society of Diagnostic Medical Sonographers (SDMS) approves our courses in Physics and Instrumentation, Abdomen, OB/GYN and Vascular applications (One Week) for continuing medical education.

**2745 N. Dallas Parkway,  
Suite 350  
Plano, TX 75093  
Phone: (214) 473-8057  
[www.sdms.org](http://www.sdms.org)**

## One Year Program Overview

---

Our One Year Program provides an extensive education in abdominal and OB/GYN sonography. Graduates will be well versed in current techniques and at ease with several commercially available ultrasound systems. **In addition to the primary program focus, several of our clinical affiliates perform neonatal neurosonology, vascular, and echocardiography examinations.** One Year students have the opportunity of rotating through these areas for an introduction to the techniques practiced in each specialty. Other specialties emphasized in the One Year Program include transvaginal sonography, and high-risk obstetrics. Clinical rotations in hospital departments of varying sizes, outpatient clinics and mobile units prepare the student to function in a variety of work situations.

Although students may be exposed to other ultrasound specialties, the One Year Program is focused on **Abdominal and OB/GYN Ultrasound**. Proficiency in other specialties should not be expected in the normal course of the program.

In order to keep tuition expenses low, the One Year General Sonography Program has evolved into a blended distance program. For all students, the didactic (class) portion of the program is offered the same way.

# One Year Program Layout

---

Over the last decade, in order to keep tuition expenses low, the One Year General Sonography Program has evolved into a blended distance program. For all students (Local and Distance) the classroom portion of the program is offered in the same format listed below.

## Pre-Boot Camp Modules

2 weeks prior to the OFFICAL start of the program, accepted students will be enrolled in an online module that will prepare them for the in person ultrasound boot camp. These modules will introduce students to material in Abdomen, OB/GYN, and Ultrasound Physics covered during the in person bootcamp. Modules will include lecture videos, reading assignments, and short questions sets. All pre boot camp work must be completed before the first day of in person class. This work is 100% online.

## 3 Week Ultrasound “Boot Camp”

All students officially begin the program with our mandatory 3 week “sonography boot camp” on campus in Daphne, Alabama. Classes begin at 8:00am and run until 5:30pm CST Monday thru Friday. For the first 3 weeks there are lectures covering normal anatomy, scan labs, and testing throughout the week. During this time we provide a good introduction from which to build. Instructor-led scan labs will orient the student to basic scan techniques and allow them to recognize normal abdominal and pelvic anatomy. After the initial 3 week session, students have the option to stay for an additional week of scan labs. This additional week gives a little extra time for the technical scan skills to develop and is encouraged for most students. There is no additional charge for the extra week of scanning.

## Clinical Portion of the 1 Year Program

Once the initial three week session concludes, didactic (class) days will be scheduled on Mondays and Fridays. Class days will include lectures (live and recorded), quizzes, interpretive modules, proctored tests, and other assignments. These items are delivered via our online course management system. Clinical rotations will occur in Tuesday, Wednesday, and Thursday of each week. Any changes to the class or clinical schedule must be approved by the Directors.

All students will be required to return for final evaluations including written and scan finals. These are conducted over 2 days and are scheduled during the last week of the program.

**As an added bonus, IUD offers a one-week vascular course two times per year.** All One Year students have the option to attend but are not required.

## Local Vs. Distance Option

---

Though the One Year General Sonography Program is a blended distance program, due to the clinical requirements for the program, we still differentiate between Local and Distance students for clinical purposes.

**LOCAL STUDENTS** - The main difference between a “Local” and “Distance” student is where the student perform their clinical requirements. For this reason we define “Local” students as those students that reside within the Local IUD clinical area (up to 90 miles from the IUD facility). **Alabama sites are in Foley, Atmore, Bay Minette, Fairhope, and Mobile, Alabama. Mississippi (local) area sites are located in Biloxi, Gulfport, and Lucedale, Mississippi.** If a student resides within that geographical area they will be required to rotate through the preapproved sites within that area for the duration of the program. A typical clinical rotation is scheduled for a 6-12 week duration (but may be longer), Tuesday thru Thursday each week. Students accepted into the program acknowledge and agree that they may be required to drive up to 90 miles to attend clinical days for the program duration.

**NOTE:** Due to the geographic area of our “Local” sites, Local students may be required to drive up to 90 miles to attend clinicals during the program. Therefore reliable transportation is required.

**DISTANCE STUDENTS** – For Distance students, at least **one clinical site(s) must be approved by the school before the student is accepted into the program.**

Clinical sites must have an adequate volume and mix of studies and employ staff registered in appropriate disciplines. If a clinical site does not provide an adequate mix of studies, additional clinical site(s) may be required for the student to successfully complete program requirements. If the school does not already have approved clinical sites in the student's area of interest, the students may be required to make initial contact with Hospitals and/or clinics in their area to get contact information to provide to the clinical director. For more information about how to approach a prospective clinical site, contact Micah Gill at [mgill@iudmed.com](mailto:mgill@iudmed.com). Students are required to clock in and out on a clinical site computer for attendance purposes.

In certain areas IUD has pre-established distance clinical sites that may be available for use. In order to identify students in these locations, distance applicants must fill out the Clinical Site Preference Form and submit it with their application. This will assist in the process for securing a clinical site. For applicants outside of areas with pre-approved sites, once it has been determined there are no pre-approved clinical site in their area, it is up to the applicant to make initial contact with potential clinical site in those areas

The One Year General Sonography Program requires good time management skills and strong self-discipline. Our distance and local students are monitored closely and receive the same education. References from past and present students will be provided upon request. If you are interested in the distance option, please contact the school to start the approval process.

# Academic Requirements

---

Applicants to the One Year General Sonography Program must be **18 years of age or older, be a graduate of an accredited High School or High School Equivalent (GED), and must, at a minimum, have completed ALL of the following college level courses before beginning the program.** Applicants completing their last prerequisite classes may be accepted into the program based on successful completion of their classes.

## Pre-Requisite Course Requirements

- 1 College Or Intermediate Level Algebra or any higher mathematics course (IE, Statistics)
- 1 Communications Course (Public Speaking, Speech, English Composition, Etc)
- Human Anatomy and Physiology I
- Human Anatomy and Physiology II
- Medical Terminology
- Medical Law and Ethics
- Introduction to Physics (does not need to be Calculus-based)
- Introduction to Patient Care\*\*\*Or CNA License

*\*\*\* Patient Care may be substituted with a Certified Nursing Assistant course (CNA). To meet this requirement an applicant must have completed the CNA course and passed their state's CNA licensing tests. **CNA licenses are highly recommended for applicants who do not have an Allied Health background.***

**Understanding of Human Anatomy and Physiology I and II and Medical Terminology are paramount to being able to complete our program successfully.**

If you made less than a B in any of those classes, it is recommended that you consider taking them again for a thorough understanding of the subject.

Human Anatomy & Physiology I & II equivalent, Medical Terminology, Medical Ethics/Law, and Introduction to Patient Care credits must have been taken within ten years of starting the sonography program, unless you are an allied health professional who is currently registered and have been practicing since graduation.

## GPA Requirements

A **minimum OVERALL College G.P.A. of 2.5 for all post-secondary course work is required** for consideration in the 1 year program.

Additionally, a **minimum of a 3.0 GPA is required for the eight pre-requisite classes**. Please note that simply having a 3.0 GPA does not guarantee acceptance.

Only Credits of a “C” or higher from any postsecondary institution that is accredited by an agency recognized by the United States Department of Education (USDE) or Council for Higher Education Accreditation (CAHEA) and match the pre-requisite course criteria will be accepted as transfer credits for pre-requisite requirements. Credits obtained through CLEP exams will also be accepted. Military education credits are accepted on a case by case review. The Institute of Ultrasound Diagnostics does not recognize credits for advanced placement or experiential learning. The Institute of Ultrasound Diagnostics is not approved to accept foreign students or foreign credits.

For students desiring to transfer from another ultrasound institution, The Institute of Ultrasound Diagnostics will consider transfer credits from schools who are accredited by an agency recognized by the United States Department of Education (USDE) or the Council for Higher Education Accreditation (CHEA) on a case by case basis.

## Student File Documentation Requirements

---

**Applicants for the One Year General Sonography program** must submit to the school the following items on or before the application deadline for their desired start date:

- C1 Completed copy of formal application for admission
- Official Copies of College/Postsecondary Transcripts
- Proof of Health Insurance (must be current on first day of class)
- Proof of Auto Insurance (must be current on first day of class)
- Proof of current CPR Certification (Must be American Heart Asso. Certified)
- Clear Copy of Driver's License or other Photo ID
- Clear Copy of Social Security Card
- 1 Reference Letter from a supervisor
- Physical Form signed by Physician
- Required shot/vaccination records (**See vaccination requirements below**)
- Sonographer Observation Sheet (**8 hours minimum**)
- Completed 1 Year Interview Questionnaire (**In-person/telephone interview may be required**)
- Copy of Allied Health Registry Card (**If Applicable**)

# Required Shot and Vaccination Records

---

## **Proof of the following immunizations are mandatory:**

- **Tuberculin (TB) Skin Test** - within the last 6 months (if positive, a chest x-ray is required within the last two years)
- **Tetanus/Diphtheria** - Current within 5 years
- **Measles/Mumps/Rubella (MMR)** - Two doses of measles are required either separately or in combination with MMR.
- **Varicella (chicken pox)** – immunization is required. History of Chicken pox is not sufficient proof of immunization. If no proof of immunization, a titer must be completed.
- **Flu Shot**

If records of immunizations are not available, titers will be required.

## **Not required but HIGHLY recommended:**

- **Hepatitis B Series** - Health situations which may prohibit the use of hepatitis B vaccine must be documented by a physician and a declination waiver must be signed by the student. Students choosing not to take the vaccine will also be required to sign a declination form.
- **Meningococcal** - not required but recommended.

All file items as well as completed prerequisite courses must be in the applicants file to be deemed “complete”. Completed files by the application deadline will get first consideration for seats into the One Year Program. If all seats are not filled with completed files, the seats will be filled by other applicants on a conditional basis.

# Additional Requirements

---

## Live Interview

Depending on the number of applicants for a given start date or based on responses on the interview questionnaire, it may be determined that a live interview is required. The interview may be done in person at IUD or over the telephone via conference call (Skype or Go to Meeting if available). Interviews will be determined on a case by case basis.

## Matriculation Requirements

If accepted into the program, matriculation is conditional upon successful completion of the following items required through [CertifiedBackgroundcheck.com](https://www.CertifiedBackgroundcheck.com):

- Drug Screen
- Level 1 Background check  
(State specific background check may be required based on clinical site location)
- SDMS Membership
- Trajecsyst Membership
- Professional liability insurance (HPSO)
- TB Skin Test

# Financial Aid Information

---

Financial aid at IUD is extremely limited. IUD does not participate in the U.S. Department of Education Title IV program, which means that FAFSA forms will not benefit you. IUD does not have access to Pell Grants or traditional “Student Loans”. However, we do offer limited financial aid for our One-Year Program including the following:

## Work Investment Opportunity Act (WIOA) – Alabama Residents Only

WIOA aid is offered for technical schools and programs. Students who qualify may receive up to \$10,000 for our one-year program. To qualify, you must be a resident of Alabama.

Our contact with WIOA is Ms. Mary Beth Driggers at (251) 943-1575, ext. 85452.

## One-Year Program Interest-Free Payment Plan

Our payment plan is ONLY available for our One-Year Program only and is interest-free. You will be required to pay a \$1,300 materials fee upfront if you qualify. The remaining balance will be paid in five separate payments of \$2,500 every quarter. Your first payment will be due on the first day of class, while your last payment will be due in the last week of school.

For more information about our tuition and fees or about our financial aid options, [contact us](#) at the Institute of Ultrasound Diagnostics today.

To apply for WIOA aid, call Ms. Mary Beth Driggers at (251) 943-1575, ext. 85452.

For information about our interest-free payment plan, call Micah Gill at (251) 621-8668, ext. 3 or email for information at [mgill@iudmed.com](mailto:mgill@iudmed.com).

# Online Prerequisite Courses

---

IUD offers most of the required prerequisites online. Please read all of the following information regarding IUD prerequisite course.

## **IMPORTANT INFORMATION & COURSE DESCRIPTIONS**

**Please read the following information carefully regarding the prerequisite classes offered by the Institute of Ultrasound Diagnostics (IUD).**

All prerequisite classes required by IUD may be taken at any accredited college or university.

If the course is not offered by your current school, it may be taken with IUD, ONLY after completion of College Level Algebra (or a high math class) and One Communications Course (I.E. Public Speaking, English Composition, etc.) AND with an overall GPA of 2.5 or higher.

IUD will only accept a “C” letter grade or higher for transferring credits.

IUD pre-requisite courses are ONLINE ONLY. They run for 12 weeks.

If a student fails any IUD prerequisite course, they will not be allowed to repeat with IUD.

IUD Prerequisite courses are intended ONLY for the IUD One Year program requirements. They will not transfer to other schools. No transcripts are given for prerequisite courses.

If you are unsure if a course at another school will meet our requirements, you may send a full course description or course syllabus to Micah Gill at [mgill@iudmed.com](mailto:mgill@iudmed.com) for preapproval.

# IUD Prerequisite Course Descriptions

---

## Medical Ethics

**Course Description:** This course discusses current issues and concepts to help prepare students for many common ethical issues related to health care professions. Students will develop essential vocabulary to understand and evaluate legal, political, and ethical challenges facing health care professionals.

**Course Objectives:** Upon completion of this course, the student will be able to:

1. Describe the main ethical principles relevant to healthcare
2. Demonstrate through understanding of ethics through evaluation of the Code of Ethics for the Profession of Diagnostic Medical Sonography
3. Apply the principles of ethics to practical cases to work towards a resolution of dilemmas encountered in the medical profession

## Introduction to Patient Care

**Course Description:** This course is designed to provide the student with an overview of health care agencies and treatment centers and the skills required to assist patients in the medical environment.

**Course Objectives:** Upon completion of this course, the student will be able to:

1. Discuss the various healthcare agencies and the services they provide
2. Demonstrate how to properly wash and glove hands for the purpose of assisting with a sterile procedure
3. Explain the components of good body mechanics with special attention to assisting & transporting patients
4. Discuss the health care provider's role in infection control and patient safety
5. Describe one's role in emergency situations
6. Explain how to assist patients with IV's, oxygen and catheter bags. Discuss various methods of patient assessment and how findings correlate with pathologic states

## Medical Terminology

**Course Description:** Medical Terminology is a study of the basic structure of medical words, including prefixes, suffixes, word roots, combining forms, singulars and plurals. The student will be able to recognize, spell, pronounce and define medical words by combining prefixes, suffixes, and roots.

**Course Objectives:** Upon completion of this course, the student will be able to:

1. Identify normal and abnormal functions and structures of the human body
2. Understand what medical terms mean in specific contexts
3. Define medical terms
4. Spell and pronounce medical terms
5. Assimilate a working knowledge of the elements and definition of medical terms
6. Read and use the language of health care
7. Correctly apply and use medical terminology

## Physics Fundamentals

**Course Description:** A study of the basic concepts of physics using only elementary principals. Topics include the concepts behind mechanics, heat, electricity, magnetism, sound, light, atomic and nuclear physics.

**Course Objectives:** Upon completion of this course, the student will be able to:

1. Understand basic Physics that will better prepare them for more rigorous Ultrasound Physics once accepted into the program
2. Define exactly what is Physics is and how it is applied in life
3. Recognize why it is detrimental to study Physics
4. Develop critical thinking and problem-solving skills
5. Nurture symbolic thought using basic algebra
6. Think in terms of direct and inverse proportions

## Anatomy & Physiology for Sonography I & II (Combined)

**Course Description:** This course provides a detailed study of the structure and function of the body with special concentration on organs important to the ultrasound field.

**Course Objectives:** Upon completion of this course, the student will be able to:

1. The student will be able to explain how life is maintained by integrating the body's structural design with its function
2. The student will be able to apply the information provided by this course to analyze and explain new situations involving the human body
3. The student will be able to identify all assigned body parts and explain their physiological mechanisms
4. Students will be able to apply the knowledge learned to develop needed skills to be a productive sonographer of the future

Mobile Bay sunset from Daphne, Alabama; Bayfront Park, February 2019

## Local Lodging

---

**IUD does not offer on-campus housing. However, there are several housing options to meet your needs.** IUD does not endorse any business, only offering assistance to help our students connect with our local area. IUD's main classroom facility is fairly large, however in the event that student volume exceeds seating for any given class, lectures may be held at the Homewood Suites in Daphne, AL. We'll alert you as soon as we know additional space at Homewood Suites is required.

In addition to Homewood Suites providing conference room should we need it, they also provide discounted rates for any students coming in for the 3-week classes. Please see below for information on rooms at Homewood Suites as well as other local hotels and accommodations.

## Hotels - Daphne and Spanish Fort, AL

**Homewood Suites – Daphne, AL:** Located one exit over from IUD, Homewood Suites provides our students with a discounted nightly rate of \$109/night. Included in that rate is a full, hot breakfast seven mornings per week, as well as a dinner Monday – Thursday. There is also a complimentary cocktail happy hour those same evenings. The rooms are equipped with a full kitchenette (including pots and pans), free wifi, workstation, and HD TV. The hotel is pet-friendly and also includes a pool and workout facilities. An attendant is on-site 24/7 for your security. [View Website >](#)

**Call (251) 621-0100 for info and reservations.**

---

**Courtyard Marriott – Daphne, AL:** Located at the Daphne I-10 exit by the Bass Pro shop, this new hotel offers suites with separate living and sleeping areas, luxury bedding, microwave, refrigerator, free internet and free local calls. Take advantage of the hotel's indoor pool and fitness center. Stay connected at the mobile hotel business center with free printing and fax services. [View Website >](#)

**Call (251) 370-1160 for more information. Ask for the “Institute of Ultrasound” rate.**

---

**Hampton Inn Eastern Shore – Daphne, AL:** Unwind in a spacious, inviting guest room and feel rested after a peaceful night's sleep in a fresh, comfy bed. Start each day with a free hot breakfast or grab one of the free Hampton on the Run® breakfast bags, available Monday - Friday, for a quick, healthy meal to go. Stay connected with free wireless high-speed internet. Outdoor pool and fitness center on-site. [View Website >](#)

**Call (251) 626-2220 for reservations.**

---

**WoodSpring Suites – Spanish Fort, AL:** Some amenities include: furnished studios, kitchens, in-room high-speed internet for a fee, vending machines, on-site washers and dryers, housekeeping available. Weekly rate for IUD students available. [View Website >](#)

**Call (251) 626-0220 for more information.**

---

**Holiday Inn Express & Suites – Daphne, AL:** Some amenities include: Outdoor Pool, Free Local Calls, Free High-Speed Internet, Complimentary breakfast with Hot Items, Fridge & Coffeemaker. [View Website >](#)

**Call (251) 621-1223 for more information.**

## Apartments and Condos

Felicia Coker has several condos/apartments available for rent, from one bed to multiple bedrooms. She has hosted many IUD students and is happy to provide references. Convenient location (less than 6 miles from IUD) and beautiful bluff-top view across Mobile Bay! These condos are cozy, private and clean. Guests tell her they never want to leave!!

One bedroom loft from Felicia Coker

Below is a link to a one bedroom loft, but she has several to offer.

<https://abnb.me/ufK64quPNV>

Please call, text (best way), or email her directly for lowest rates and availability.

### **Felicia Coker**

## Tuition and Fees *(New Tuition Effective July 1, 2019)*

---

Tuition and fees are listed here for courses and programs offered. There are no carrying charges, interest charges, service charges, out of state, or application fees at this time. Tuition and fees may be subject to change at any time.

### 2019-2020 Fee Schedule

#### **ONE YEAR GENERAL SONOGRAPHY PROGRAM (LOCAL AND DISTANCE)**

##### *Tuition and Fees Paid to IUD*

One Year Program	\$11,250.00
Books/Materials	\$1,000.00
Technology Fee	\$1,000.00
Lab Fee	\$550.00
<b>Total paid to IUD</b>	<b>\$13,800.00</b>

##### *Additional Fees for One Year Program*

###### **To be completed before first day of class:**

Background Check/Drug Screen (paid directly to provider)	\$117.00
--	----------

###### **These fees are paid during the first week of classes:**

Clinical Fee—Trajecsys (paid directly to provider)	\$100.00
SDMS Membership (paid directly to SDMS)	\$40.00
Liability Insurance (paid directly to provider)	\$36.50
Online Test Proctor	\$15.00

###### **This is paid 6 months into program:**

Registry Prep. Package (paid directly to provider)	\$216.00
--	----------

<b>Total cost for One Year Program</b>	<b>\$14,324.50</b>
--	--------------------

#### **PREREQUISITE TUITION & FEES**

Anatomy & Physiology (books included)	\$600.00
Medical Terminology (books included)	\$500.00
Physics Fundamentals (books included)	\$500.00
Medical Law & Ethics	\$500.00
Introduction to Patient Care	\$500.00

# 2020 IUD Course Calendar
